MBWIRI

ENGINEERING | DESIGN | FABRICATION

CAPABILITIES OVERVIEW

Practical Engineering and Fabrication Solutions

MBWIRI provides engineering design, concept evaluation, and fabrication support for individuals and businesses of all sizes. We support new and existing industrial equipment, equipment modifications, custom assemblies, and the implementation of new systems.

Mechanical design & CAD documentation

Support for equipment layouts, components and custom assemblies, with drawings and technical documentation aligned to the agreed project scope.

Concept evaluation & idea development

Help translate an idea, sketch or equipment challenge into a defined design direction, practical requirements and next steps.

Fabrication & dimensional support

Drawing clarification, fabrication coordination and dimensional checks to help connect design intent with shop and installation needs.

Field / construction support

Technical support for equipment modifications and installation coordination, informed by existing conditions and project requirements.

A practical resource for your team

Over 13 years of industrial engineering experience, applied to design, documentation and field / construction support. Available to discuss needs with equipment owners, fabricators, OEMs, procurement teams and engineering managers.

DISCUSS YOUR PROJECT

Share the equipment or assembly involved, the support you need, available drawings and your target schedule. Use **mbwiri.com/contact** or email **info@mbwiri.com**.
